

Re: FCC ID UCE210034A

SAR Report RFI-SAR2-RP79094JD19A

Additional explanation of EUT test orientations and SAR scans

The DASY 4 system details are in SAR Report Part 4 Appendix 7 (Page 163-165).

The DASY system generates the scans and provides a full cube for only the highest SAR point identified for each scan. Other hot spot zoom scans shown on the area scan are not measured by the DASY system as they are not within 2dB of the highest SAR level. This is standard characteristic of the DASY system. (Ref. SAR Report Part 2a and 2b).

Relevant SAR Scans and results are shown in SAR Report Part 2a and 2b, Appendix 3 (Page 42-111) contained in "RF Exposure Info" exhibit folder of this filing.

All required SAR test orientations are shown in "SAR Report Part 3 Test Set Up" confidential exhibit contained in the "Test Set Up Photos" exhibit folder of this filing. (Ref. SAR Report Part 3 Appendix 4).
