Letter of Attestation for Power Conformity

Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046

We, Cisco Systems, Inc., declare this equipment has channel selection/operation algorithms to comply with FCC rules when radio 1 and radio 2 transmit simultaneously in 2.4GHz or 5GHz mode.

The Meraki Z3 (Model: Z3-HW, FCC ID: UDX-60053010) wireless security appliance firmware will take the following actions to ensure RF compliance within FCC regulations:

- (a) Rely on an algorithm coded in our firmware to avoid concurrent same-channel transmission of radio 1 and radio 2.
- (b) Power reduction settings are not customer adjustable. Tools exist for customer configuration via Meraki Dashboard to reduce the power beyond the required reduction. Please see other attestation/filing documents related to SDR and radio configuration control/country setting for more information.

Meraki Access Point firmware is optimized by design to eliminate simultaneous same-band transmission.

Sincerely,

A handwritten signature in blue ink, appearing to read "AGioe", with a long horizontal flourish extending to the right.

Alexander C. Gioe
