Subject: Sunrise Telecom Inc. , FCC ID: UEBHTT01 , Assessment NO.: AN06T5971, Notice#1

Question #1: The user manual does not contain regulatory statements as specified in FCC Part15. Please include the following statement into the manual:

USA-Federal Communications Commission (FCC)

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Caution: Exposure to Radio Frequency Radiation.

To comply with FCC RF exposure compliance requirements, This device must not be co-located or operating in conjunction with any other antenna or transmitter.

<answer> manual is revised.

Question #2: The proposed FCC ID label format shows two examples of the ID label, please confirm which one will be used on final products.

<answer> label is revised.

Question #3: The test report includes MPE calculation, but this device can be

used in portable configuration, because the power is way below the low threshold specified in TCB exclusion list 2002-07, you may remove MPE calculation from the report. Then the grant will not show restriction as "a separation distance of at least 20 cm must be maintained between the antenna of this device and all persons."
<answer> report is revised.

Question #4: The test report section 5.4 - please indicate which test software is for WiFi receiver, which software is for BT operation.
Please update the test report.
<answer> report is revised.

Question #5: The test report section 7.1.2 & 7.1.4 show test plots only, no test result summary. Please update the test report.
<answer> report is revised.

Best Regards
Helen Zhao

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
