

Engineering and Testing for EMC and Safety Compliance

March 12, 2010

American Telecommunications Certification Body, Inc.
6731 Whittier Avenue
Suite C110
McLean, VA 22101

Subject: FCC ID: UFE-R3MOD24A

To whom it may concern:

The FCC Grant for this certification shows "Notes: 2.4 GHz Module/4139264"

The correct information is "Notes: 2.4 GHz Module/4123659"

The applicant's intent of the number referenced in the "notes" field is to indicate the model number of the module. The number originally referenced in the "notes" field is erroneous, and is actually the iRobot database document number for the PCAD board layout file.

The difference is creating difficulty and hardship for iRobot as they try to obtain approval in the Latin/South American economies.

We respectfully submit a request for a change in the Notes section on the FCC Grant. In addition, we request that the test report showing "2.4 GHz Module/4123659", submitted with this letter, be placed on the FCC site for consistency. The only change to the test report is to the module model number; no other changes have been made to the report or test data.

Please advise if there are any questions. Thank you for your consideration.

A handwritten signature in cursive script that reads "Kathy Grzovic". The signature is written in dark ink on a light-colored background.
