

Feb 4, 2009

To Whom It May Concern:

This letter is providing the additional information for the Permissive Change application. The model 12501 is based on the previously original certified model 18473. The following component has been changed:

1. Internal Antenna – to prevent robot getting stuck by gutter
2. PWM Control – to control the motor speed

All design including electronic, electrical and construction remain the same except the above mentioned. The above specified change is not intended for maximum power.

Sincerely,

Alan Weeks
