## 1. Abstract

This manual provides specifications for the OPN-3200i handheld Bluetooth 2D imager scanner.

## 2. Overview

The OPN-3200i is a handheld 2D imager scanner that enables high speed scanning of standard linear (1D) and 2D symbologies. The scanned data is output via Bluetooth.

- All bar code data scanned is transmitted to a host device through the Bluetooth interface.
- The scanner can work with many Bluetooth-enabled host devices, such as PCs, tablet PCs and smart phones.
- Bluetooth SPP (Serial Port Profile) and HID (Human Interface Device Profile) are implemented.
- The scanner can read bar codes from LCD screens.
- This scanner is equipped with a vibrating function that can signal certain events to the users even in noisy environments. Additionally it has a buzzer and a LED indicator.
- A single green LED aiming line toward a target bar code can help the users find the appropriate scanning position.
- Special antimicrobial treatment is applied to the chassis, and alcohol can be used to wipe the scanner clean (except for the scanning window and the logo panel).
- The power source is 3.7 V 1100 mAh (typ.) lithium-ion battery.
- A dedicated charging cradle CHG-3201 is supplied for recharging and easy storage of the scanner.
- The scanner is Apple MFi certified.
