Re: FCC ID: UGL633ANH

To Whom It May Concern:

The following application is submitted on behalf of our client, DRS Tactical Systems, Inc., for evaluation of FCC ID: UGL633ANH under a class II permissive change.

The purpose of this application is to add an additional external antenna / specific host to single modular approved FCC ID: UGL633ANH as well as add co-location with DRS Tactical Model, GOBI2000 (FCC ID: UGLGOBI2) and Castlenet Technology, Model BTC04R (FCC ID: RK9-BTC04R) in both mobile and portable configurations. The new antenna is for the mobile configuration only.

For portable applications, FCC ID: UGL633ANH was evaluated as integrated in the DRS Tactical Systems, Inc. portable ARMOR X10gx ruggedized tablet computer. For mobile applications, the host device was plugged in the vehicle docking station (9800F26200-0000), which utilizes the new unapproved external antenna (MGW-301-3C3C2C).

Details of the ARMOR X10gx ruggedized tablet computer are included in the user's guide, external photographs, internal photographs, and labeling information provided in this application.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive, flowing style.
