To whom it may concern:

Re: MCMS - WAVI01 - FCC Original Grant

Dear Sir/Madam,

Further to the FCC Original Grant submission for the WBSn-2450 base station unit, please be advised that the regulatory domains (country codes) are set according to the location to which the base station is to be sent. Furthermore, changing of regulatory domains will not be permitted for any product sold in North America.

Yours sincerely,

Ruby Tweg
