

- 1.) For Industry Canada page 2 of the ATCB IC Forms must be filled out completely. The 99% Bandwidth must be filled in and a plot must be included in the test report. Please revise test report and IC Form to include this information. The information from the 99% bandwidth needs to be put in the emission designator also. I have included the IC Emission Designator TRC 43 Oct. 1982 to help you with this, please see page 8 of the attachment. I will need this information before I can issue the Canadian Certificate. All IC filings need this.

The amendment reports were uploaded to web site.

Please see to page 4:

1.1 Description of EUT operation

Please see to page 5.

The revised IC forms were uploaded to web site.
