音频解码

解码格式	指示灯
SBC	无指示灯亮起
AAC	无指示灯亮起
APTX	绿色LED灯亮起
APTX-LB	绿色LED灯亮起
APTX-HD	绿色LED灯亮起

技术参数

兼容音频编解码器: V5.0 支持: HFP, HSP, A2DP, AVRCP
 蓝牙版本: V5.0
 传输速率: 2.4GHz-2.485GHz
 待机时间: >150h
 充电时间: 1.5h
 续航时间: >15h

反面

For user's safety, please read this manual before using the headset.

The following matters should be paid attention to when using headset:

Please avoid long-term use of high volume mode because it is bad to hearing loss caused by noise.

If you use a head-mounted or over-ear device, please stop using headset, in order to ensure safety.

Don't exceed reasonable control the volume and time when listening to the headset.

The volume should not be too high otherwise you can't hear the audio properly. Volume is too high that may cause hearing loss. When lower down the volume.

Over-ear use the music with device.

Use by soft cloth to fix the headset. Should avoid the headset with the sweat that will cause headset damage.

The headset should not be used in case of temperature below -15°C (5°F) or higher than 55°C (131°F) otherwise will reduce the battery life.

Charging and Battery

Please charge the headset with original charging cable. It may damage the battery of the headset if you are using improper charging cable.

This headset has a built-in rechargeable battery, so do not attempt to remove the battery from the headset to avoid damaging it.

The battery (battery pack or combination) must be replaced for conditions such as weak, fire, or similar conditions.

If the battery is over-charge, reduced, there is a range of indicators and a range of indicators with a battery of the same type as expected.

Warning
The power adapter for charging the headset is not included. Use high voltage power adapter for charging the headset. Please use the power adapter for charging the headset.
