#### **Government Disclaimer Notice**

When government drawing, specification, or other data are used for any purpose other than in connection with a definitely related government procurement operation, the United States Government thereby incurs no responsibility nor any obligation whatsoever; and the fact that the Government may have formulated, furnished, or in any way supplied the said drawing, specifications, or other data, is not to be regarded by implication or otherwise in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use, or sell patented invention that may in any way be related thereto. This report must not be used to claim product endorsement by NVLAP or any agency of the U.S. Government.

#### **Reproduction Clause**

Any reproduction of this document must be done in full. No single part of this document may be reproduced without permission from EMC Compliance Management Group, 670 National Ave., Mountain View, CA 94043.

#### **Opinions and Interpretations**

This test report relates to the abovementioned equipment under test (EUT). Without the permission of EMC Compliance Management Group Test Lab this test report is not permitted to be duplicated in extracts. This test report does not entitle to carry any test mark on this or similar products. The manufacturer has sole responsibility of continued compliance of the device.

#### **Statement of Measurement Uncertainty**

The data and results referenced in the document are true and accurate. The reader is cautioned that there may be errors within the calibration limits of the equipment and facilities that can account for a nominal measurement error. Furthermore, component and process variability of devices similar to that tested may result in additional deviation.

#### **Administrative Data**

Test Sample : Microwave Oven

Model Numbers : P90DXY-Z

Model Tested : P90D25EP-D4

Brand Name : Galanz

Date Tested : 2007, April 2<sup>th</sup>

Applicant : Guangdong Galanz Enterprises Co., Ltd.

25 Ronggui Nan Rd., Shunde, Foshan, Guangdong,

China.

Telephone : 86-0757-23612785

Fax : 86-757-23612537

Manufacturer : Guangdong Galanz Enterprises Co., Ltd.

25 Ronggui Nan Rd., Shunde, Foshan, Guangdong,

China.

#### **EUT Description**

Guangdong Galanz Enterprises Co., Ltd. model tested P90D25EP-D4 (referred to the EUT in this report) is a Microwave Oven.

Specifications:

| Model Number            | P90D25EP-D4                 |
|-------------------------|-----------------------------|
| Power Consumption:      | 230V~50Hz, 1400W(Microwave) |
| Output:                 | 900W                        |
| Operation Frequency:    | 2450MHz                     |
| Magnetron Manufacturer  | Galanz                      |
| Magnetron Model Number  | M24FB-610A                  |
| Outside Dimensions:     | 281mm(H)×483mm(W)×378mm(D)  |
| Oven Cavity Dimensions: | 219mm(H)×350mm(W)×355mm(D)  |
| Oven Capacity:          | 25 Litres                   |
| Cooking Uniformity:     | Turntable System {Φ314 mm}  |
| Net Weight:             | Approx.14.5 kg              |

#### Type of Deriver

P90DXY-Z model designations:

P: denotes only the Microwave functions.

90: denotes the output power is 900W.

D: Denotes the the type of the cavity.

X may be 23 or 25., 23:Denotes capacity in 23 liters; 25: Denotes capacity in 25 liters.

Y may be L,P,J,SL,SP,SJ,TL,TP,TJ,AL,AP,AJ,ASL,ASP, ASJ,ATL, ATP,ATJ,EL,EP,EJ,ESL, ESP,ESJ,ETL, ETP,ETJ,ML,MP,MJ,MSL,MSP, MSJ,MTL, MTP,MTJ.

"L" and "J" is pull-out type door, P is push-button type door. When there is no letter before "L", "P" and "J", denotes mechanical control model; When there is "A", "E" or "M" denote the electrical control model. "S" denotes stainless steel cavity; "T" denotes the gray cavity; When there is neither "S" nor "T" before "L", "P" or "J", denotes the epoxy painted cavity.

Z may be any combination of one to five letters and/or numbers representing cosmetic differences.

#### **Test Summary**

The Electromagnetic Compatibility requirements on model tested P90D25EP-D4 for this test is stated below. All results listed in this report relate exclusively to this above-mentioned model as the Equipment Under Test. This report confers no approval or endorsement upon any other component, host or subsystem used in the test set-up.

| Emission Tests   |                                       |                                    |            |              |  |

#### **Load for Microwave Ovens**

For all measurements the energy developed by the oven was absorbed by a dummy load consisting of a quantity of tag water in a beaker. If the oven was provided with a shelf or other utensil support, this support was in its initial normal position. For ovens rated at 1000watts or less power output, the beaker contained quantities of water as listed in the following subparagraphs. For ovens rated at more than 1000watts output, each quantity was increased by 50% for each 500watts or fraction thereof in excess of 1000watts. Additional beakers were used if necessary.

- --Load for power output measurement: 1000 milliliters of water in the beaker located in the center of the oven.
- --Load for frequency measurement: 1000 milliliters of water in the beaker located in the center of the oven.
- --Load for measurement of radiation on second and third harmonic: Two loads, one of 700 and the other of 300 milliliters, of water are used. Each load is tested both with the beaker located in the center of the oven and with it in the right front corner.
- --Load for all other measurements: 700 milliliters of water, with the beaker located in the center of the oven.

#### **Equipment Modification**

Any modifications installed previous to testing by Guangdong Galanz Enterprises Co., Ltd. will be incorporated in each production model sold or leased in United States.

There were no modifications installed by EMC Compliance Management Group (China) test personnel.

## ATTACHMENT 1 - RADIATION HAZARD TEST

| CLIENT:                   | Guangdong Galanz<br>Enterprises Co., Ltd.  | TEST STANDERD:   | FCC Part 18           |  |
|---------------------------|--|------------------|-----------------------|--|
| MODEL NUMBERS:            | P90DXY-Z   | PRODUCT:         | Microwave Oven        |  |
| MODEL TESTED:             | P90D25EP-D4  | EUT DESIGNATION: | Home or Office        |  |
| TEMPERATURE:              | <b>22</b> ℃  | HUMIDITY:        | 60%RH                 |  |
| ATM PRESSURE:             | 101.1kPa   | GROUNDING:       | Through AC Power Cord |  |
| TESTED BY:                | King Su  | DATE OF TEST:    | 2007, April 2         |  |
| TEST REFERENCE:           | ANSI C63.4: 2003, FCC/OST  | MP-5:1986        |                       |  |
| TEST PROCEDURE:           | The EUT was set up according to the FCC MP-5 and FCC Part 18 for Radiation Hazard Measurement. The measurement was using a microwave leakage meter to measure the Radiation leakage in the as-received condition with the oven door closed. A 1000ml water load in a beaker was located in the center of the oven and the Microwave oven was set to maximum power. While the oven operating, the microwave meter will check the leakage and then record the maximum leakage. |                  |                       |  |
| TESTED RANGE:             | N/A  |                  |                       |  |
| TEST VOLTAGE:             | 120VAC / 60Hz  |                  |                       |  |
| RESULTS:                  | There was no microwave leakage exceeding a power level of 0.0031 mW/cm2 observed at any point 5cm or more from the external surface of the oven.  A maximum of 1.0mW/cm2 is allowed in accordance with the applicable FCC standards. Hence, microwave leakage in the as-received condition with the oven door closed was below the maximum allowed.  The test results relate only to the equipment under test provided by client.  |                  |                       |  |
| Changes or Modifications: | There were no modifications installed by EMC Compliance Management Group (China) test personnel.   |                  |                       |  |
| M. UNCERTAINTY:           | 0.0001 mW/cm2  |                  |                       |  |

## Test equipments list:

| TEST REFERENCE:           | ANSI C63.4: 2003, FCC/OST  | MP-5:1986        |                       |  |
| TEST PROCEDURE:           | The EUT was set up according to the FCC MP-5 and FCC Part 18C for RF output power Measurement. The Caloric Method was used to determine maximum RF output power. The initial temperature of the water load was measured. A 1000ml water load in a beaker was located in the center of the oven. The oven was operated at maximum output power for 120 seconds, the temperature of the water was re-measured.  RF Output Power  = (4.2joules/calorie)(volume in milliliters)(temperature rise) / (time in seconds)  = 4.2 joules/calorie × 1000 × (Final Temp – Initial Temp) / 120 |                  |                       |  |
| TESTED RANGE:             | N/A  |                  |                       |  |
| TEST VOLTAGE:             | 120VAC / 60Hz  |                  |                       |  |
| RESULTS:                  | RF Output Power = 661.5watts   |                  |                       |  |
|                           | The test results relate only to the equipment under test provided by client.   |                  |                       |  |

Comments: None

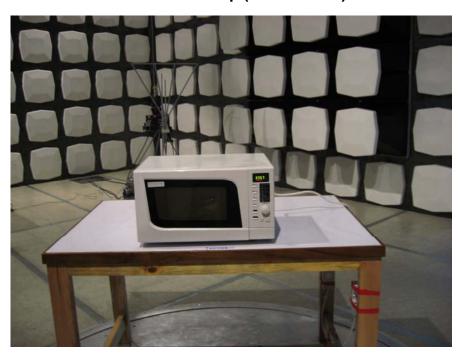

Note: All readings are average unless stated otherwise, using a bandwidth of 1MHz, with a 30 ms sweep time. A video filter was not used.

## Test equipments list:

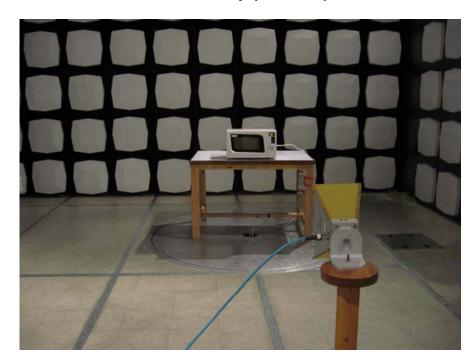

| Test Equipment             | Manufacturer  | Model    | Serial No. | Last Cal. | Cal. Due |
|----------------------------|---------------|----------|------------|-----------|----------|
| Vltra Broadband<br>Antenna | ETS           | 3142C    | 00042672   | 20/07/06  | 19/07/07 |
| Horn Antenna               | ETS           | 3115     | 6587       | 03/07/07  | 03/07/08 |
| Band-pass Filter           | Micro-Tronics | BRM50702 | SIN-030    | 03/07/07  | 03/07/08 |
| EMI Receiver 1             | SCHAFFNE      | SMR4503  | 44         | 03/07/06  | 03/07/08 |
| Semi-anechoic chamber      | ETS           | 3m       | N/A        | 19/03/07  | 18/03/09 |
| EMI Receiver 2             | R&S           | FSP30    | 100755     | 03/12/07  | 03/12/08 |

Note: All testing were performed using internationally recognized standards. All test instruments were calibrated and traceable to the National Institute of Standards and Technology (NIST).

### Radiated Emission Test Set-up (30~1000MHz):

## Radiated Emission Test Set-up (1~25GHz)
