Re: FCC ID: UIDTG1672

To Whom It May Concern:

The following application is submitted on behalf of our client, Arris International, Inc., for evaluation of their models TG1672G & TG1662G for certification under FCC Part 15.247.

The TG1672G combines two analog voice lines, a 4-port Gigabit Router, and 802.11n radios into a single device capable of supporting both home and small office applications. TG1672G & TG1662G are electrically identical with respect to the RF and differ only slightly.

The TG1662G model has the same enclosure and PCB layout as the TG1672G, except the MoCA Chipset is depopulated.

The TG1672G was tested in full to the requirements of the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads "R. Sam Wismer". The signature is written in a cursive, flowing style.
