

WECB460 WEB GUI Guide

FCC Statement:

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

For product available in the USA/Canada market, only channel 1~11 can be operated. Selection of other channels is not possible.

This device and its antennas(s) must not be co-located or operating in conjunction with any other antenna or transmitter except in accordance with FCC multi-transmitter product procedures.

This device is going to be operated in 5.15~5.25GHz frequency range, it is restricted in indoor environment only.

IMPORTANT NOTE:

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

IC Statement:

This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

For product available in the USA/Canada market, only channel 1~11 can be operated. Selection of other channels is not possible.

Pour les produits disponibles aux États-Unis / Canada du marché, seul le canal 1 à 11 peuvent être exploités. Sélection d'autres canaux n'est pas possible.

This device and it's antennas(s) must not be co-located or operating in conjunction with any other antenna or transmitter except in accordance with IC multi-transmitter product procedures.

Cet appareil et son antenne (s) ne doit pas être co-localisés ou fonctionnement en association avec une autre antenne ou transmetteur.

The device for the band 5150-5250 MHz is only for indoor usage to reduce potential for harmful interference to co-channel mobile satellite systems.

les dispositifs fonctionnant dans la bande 5150-5250 MHz sont réservés uniquement pour une utilisation à l'intérieur afin de réduire les risques de brouillage préjudiciable aux systèmes de satellites mobiles utilisant les mêmes canaux;

IC Radiation Exposure Statement:

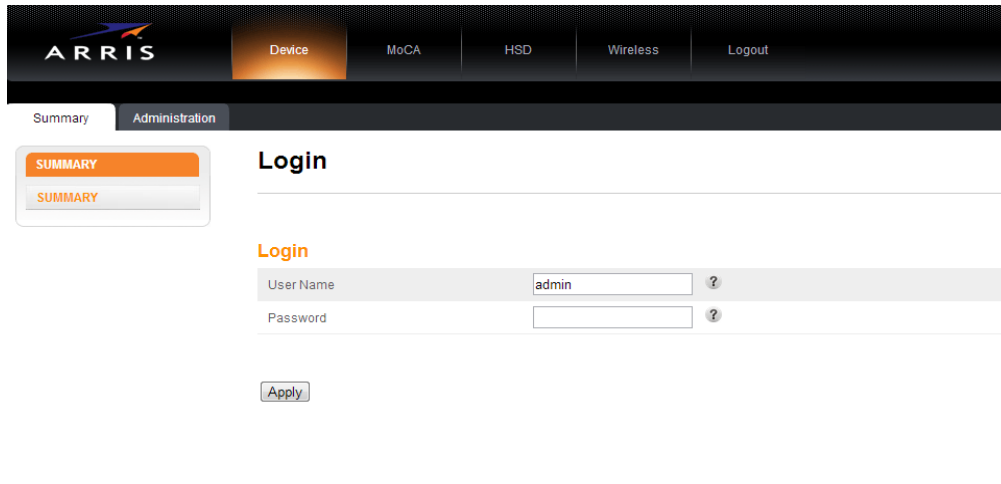

This equipment complies with IC RSS-102 radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

Cet équipement est conforme aux limites d'exposition aux rayonnements IC établies

pour un environnement non contrôlé. Cet équipement doit être installé et utilisé avec un minimum de 20 cm de distance entre la source de rayonnement et votre corps.

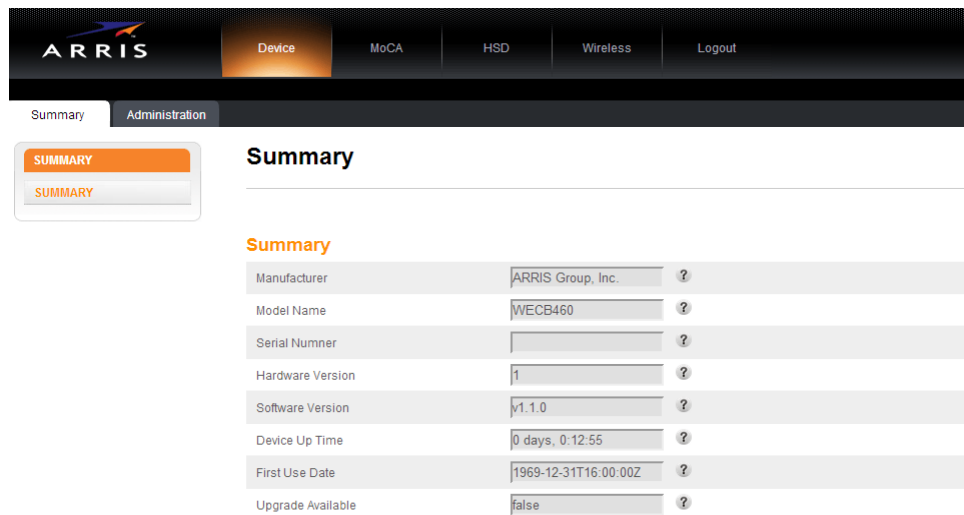

1. Basic WEB GUI

- a. Connect to WECB (<http://www.myarrismocarepeater.net>) via web browser

The screenshot shows the ARRIS web GUI interface. At the top, there is a navigation bar with the ARRIS logo and several menu items: Device (highlighted), MoCA, HSD, Wireless, and Logout. Below the navigation bar, there are two tabs: Summary and Administration (selected). On the left side, there is a sidebar with two buttons labeled SUMMARY. The main content area is titled "Login" and contains a form with two input fields: "User Name" (containing "admin") and "Password". Each input field has a question mark icon to its right. Below the input fields is an "Apply" button.

- b. Login with [admin/password](#), the web page will be automatically redirected to device summary page. The read-only field display in grey out font style.

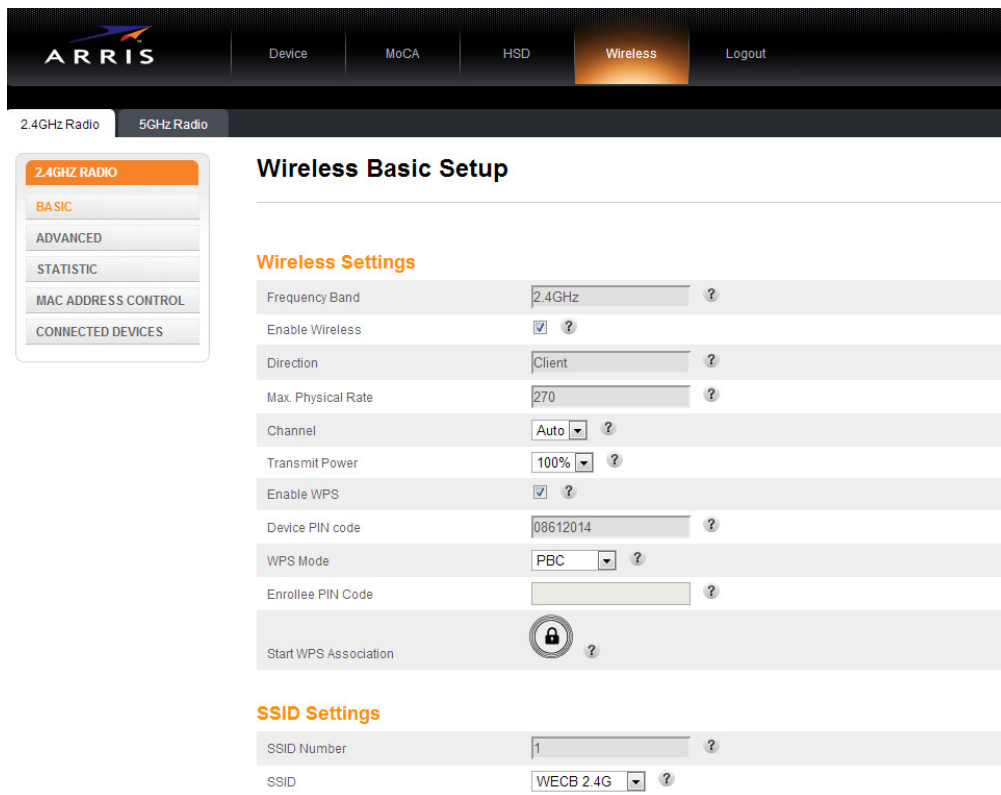

The screenshot shows the ARRIS web GUI interface after logging in. The navigation bar and tabs are the same as in the previous screenshot. The main content area is titled "Summary" and contains a table of device information. The table has two columns: the field name and the value. Each row has a question mark icon to its right. The values are displayed in a greyed-out font, indicating they are read-only.

Summary	
Manufacturer	ARRIS Group, Inc.
Model Name	WECB460
Serial Numner	
Hardware Version	1
Software Version	v1.1.0
Device Up Time	0 days, 0:12:55
First Use Date	1969-12-31T16:00:00Z
Upgrade Available	false

2. 2.4G WiFi

- a. Click “Wireless” tag on the top, the wireless basic setup page will be displayed.

User may modify the wireless setting here.

3. 5G WiFi

- a. Click "5GHz Radio" tag on the middle top, the 5G wireless basic setup page will

be displayed. User may modify the wireless setting here.

The screenshot displays the ARRIS Wireless Basic Setup interface. At the top, there is a navigation bar with the ARRIS logo and menu items: Device, MoCA, HSD, Wireless (highlighted), and Logout. Below the navigation bar, there are tabs for 2.4GHz Radio and 5GHz Radio. On the left side, there is a sidebar menu with options: 5GHZ RADIO (highlighted), BASIC, ADVANCED, STATISTIC, MAC ADDRESS CONTROL, and CONNECTED DEVICES. The main content area is titled "Wireless Basic Setup" and is divided into two sections: "Wireless Settings" and "SSID Settings".

b. In MoCA statistic page, it will display current translate information.

The screenshot shows the MoCA Statistics page. The top navigation bar is the same as the previous page. The 'Statistics' tab is selected. The 'MoCA Statistics' section contains a sidebar with 'STATISTICS' buttons and a main area with the following statistics:

Statistic	Value	Help
Packets Sent	58	?
Packets Received	1376	?
Errors Packets Sent	0	?
Errors Packets Received	1	?
Discard Packets Sent	0	?
Discard Packets Received	0	?

c. In MoCA connected device page list, it will show all MoCA devices in the network and use bold font as local MoCA device MAC address.
