RE: FCC ID: UIPN2500AAAA0200A_ATCB004817

Attention: Kathy Grzovic

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please provide the required tune up procedure for this licensed device. Please note that the tune up procedure required is the factory tune up procedure and is not to be confused with any end user tuning capability.

Response: As the transmitter is a broadband device, there are no tuneable elements, with the exception of the duplexer. The duplexer tuning instructions and specifications have been uploaded with this response.

2. Please note that the manual (page 4) states the device complies with parts 90 and 101 however this is a part 27 application. Please explain and correct as applicable.

Response: Please refer to the revised manual exhibit uploaded with this response.

3. Please note that the manual calls this device a "terminal" however, the 731, rf exposure report and other documentation says this is a licensed station. Is this a subscriber terminal or is this a station requiring site licensing? Please provide a manual and operational description that explains in more detail the intent of this device.

Response: Please refer to the revised manual exhibit uploaded with this response, specifically the "Compliance General" section on page 5 of the uploaded file, for an explanation of "terminal".

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
