RE: Extended Frequency Justification

To Whom It May Concern:

We, 4RF Limited, would like to submit the following justification to show the frequency range as 450-512 MHz on the Grant of Equipment Authorization for UIPSQ450M140.

The frequency range is applicable to FCC Part 90 radiocommunications systems that would include TV sharing, public agencies, emergency services, commercial, business and industrial services etc.

Frequency:	Application
450 – 470	Part 90.203(j)(5)
470 – 512	Part 90.203(j)(5) and Subpart L

Also the frequency of operation of the data radio cannot be programmed by FCC Part 90 operators to transmit on frequencies outside of FCC Part 90 frequencies. The frequency of operation is password protected and is only accessible by professional service personnel. From the FCC KDB634817 guide, it is noted that FCC rules would be violated if the unit is programmed to operate on frequencies outside of FCC Part 90 frequency bands.

Note this letter is part of the technical product description and is to be held confidential.

For and on behalf of
4RF Limited
Sincerely,

Paul Young
Compliance Manager
