

Aprisa SR variants/options

Date: 2013-11-26

| Frequency band (MHz) | Channel spacing (kHz) | Antenna option | Model number |
|----------------------|-----------------------|----------------|--------------|
| 135-175 | 12.5 | Single | SR N100-000 |
| 135-175 | 12.5 | Dual | SR N100-001 |
| 135-175 | 25 | Single | SR N100-010 |
| 135-175 | 25 | Dual | SR N100-011 |

The differences between the variant/options are:

Channel spacing (12.5 and 25 kHz)

The channel spacing difference is in the components fitted in the RF section. fitted/not-fitted/different values fitted to ensure operation in the correct channel spacing.

Antenna option (Single and Dual)

Similar to the channel spacing, in the RF section, different components are fitted/not-fitted/different values fitted to provide the single or dual antenna output.
