**Subject:** 2MTECH Inc., FCC ID: UJO-ZAMM-TM, Assessment No.: AN06T6093, Notice #1

Dear Ms. Helen,

Thank you for your cooperation and kindness.

Regarding the Assessment no. AN06T6093, we would like to inform you as follows,

Question #1: The test report (page 5) indicate: TX FREQUENCY RANGE: 88.1 MHz ~ 107.9 MHz (range into 200 kHz Step), which does not agree with operational description and user manual. Please explain.

---> Please refer to attached revised test report. The information of operational description and manual is correct.

Question #2: The test report (page 6) indicates: "The EUT does not have an audio input poty, so the internal 1 kHz modulation signal was transmitted with maximum sudio level. "But this device does have 2 AV ports. Please explain.

---> Please refer to attached revised test report. Your information is correct.

If you have any question, please feel free to contact us.

Thank you and have a great day!

Best Regards,

S. C. Hong / Project Engineer
