Re.: Label Location  
IC: 6695A-3000

To Whom It May Concern:

The FCC and IC ID-Label are placed on the battery compartment because of the following reasons:

- a. The available area on the device is limited because it is relatively small and has many contoured surfaces, keypads, lens, connector and ear-bud/microphone cable.
- b. The battery compartment door and batteries are designed for easy removal and the label will be visible whenever the batteries are removed for charging or replacement.
- c. To comply with Part 2.925 (d), the label will be readily visible at the time of purchase because the device will be marketed without the battery installed.

Sincerely,

Ki Yuen
