

# GM9K SERIES (INCLUDE GM9K1 / GM9K2 / GM9K3): GAS FIRED CONTROL SYSTEM

H13

# USER MANUAL -FOR OEM USE ONLY

# GM9K1 / GM9K2 / GM9K3 Control Module

## **WARNING**

Fire or explosion hazard. Attempted disassembly or repair of controls can cause property damage, severe injury or death. Do not disassemble the gas valve; it contains no serviceable components.

Read these instructions carefully. Failure to follow them could result in a fire or explosion causing property damage, personal injury, or loss of life. The product must be installed and operated according to all local regulations.

A. **BEFORE OPERATING** verify that no gas is in the area around the appliance, including near the floor.

## WHAT TO DO IF YOU SMELL GAS:

- Do not light any appliance.
- Do not touch any electrical switch; do not use any phone in your building.
- Immediately call the gas supplier from a neighbor's phone. Follow the gas supplier's instructions.
- If you cannot reach the gas supplier, call the fire department.
- B. Use only your hand to push in or turn the gas control knobs. Never use tools. If a knob will not push in or turn by hand, don't try to repair it, call a qualified service technician. Force or attempted repair may result in a fire or explosion.
- C. Do not use this control or any gas appliance if any part has been under water or in contact with water. Immediately call a qualified service technician to replace the control system and any gas control system which has been under water or in contact with water.
- D. These instructions are to be referenced as a user guide, and do not supersede appliance manufacturer's lighting instructions.

# FEATURES

- Electronic ignition control system
- Ignition by supervised gas-fire pilot burner
- Support pilot flame sensing:
  - Ionization flame detection
  - Thermpcouple flame detection
- Max 9 hours idle auto shutdown
- Manual control and Remote control
- Flame height adjustment
- Flexible combination of AC/DC output to control FAN, LIGHT, AUX
- Second burner control
- Thermostat function

#### APPLICATION

GM9K series is an electronic ignition control module for gas appliances with pilot burners, ODS systems, remote function, second burner and extra AC/DC output. Control module is a combination of control board and power board.

### **GENERAL NOTES**

#### Multiple Remote Control Solutions:

- GM9K1 for Unidirectional RF (434 MHz)
- GM9K2 for Bidirectional RF (434 MHz) (Support RevoHome SYS.)
- GM9K3 for Bluetooth

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

## Primary source(AC):

An AC Main Adapter may be used instead of batteries. (AC source according to CSA and CE.) Secondary source(DC):

- 4 x 1.5V "AA" Batteries.
- (quality alkaline recommended)
- AC to DC 6.5V 1.5A adapter.

## NOTE:

 Power board needed AC power to perform all functions, while AC power lost, power board function may lost simultaneously.

## SYSTEM WIRING DIAGRAM

#### NOTE:

"The pilot valve flame power must be limited to 250 Thermal Watt" This is mandatory to avoid the test to the pilot valve as safety relevant valve.

## **OPERATION**

Using the ON/OFF/REMOTE Switch to change system operation mode on Manual, Power OFF and Remote.

### Manual Mode:

Switch from O to I as Manual mode, system will execute ignition process and remote function will disable on this mode.

### Remote Mode:

Switch from O to II as Remote mode, system standby and waiting remote signal.

NOTE: On this mode system can do pairing

between control module and remote handset. ( See <u>SETTING THE ELECTRONICS</u>

### Power OFF:

Switch to O as Power OFF, system and main gas valve shutdown.

# SETTING THE ELECTRONICS CODE

(First time use only)

A code is selected automatically for all GRAND MATE electronics from among 65,000 random codes available. The control module had to learn the code of the handset:

- Switch from O to II as Remote mode. (see Figure 6)
- Press control module's learn button (see Figure 7 or 8), an acoustic signal and green LED flashing.
- Within the subsequent 10 second press any button on the remote handset until you hear two (2) beep confirming the code is set.
- **NOTE:** This is a one time setting only, and is not required when changing the batteries in the remote or control module.

Figure 6: Switch to remote mode

Figure 7: Control module's external learn button

Figure 8: Control module's internal learn button

# SYSTEM SPECIFICATIONS

TABLE 4. SYSTEM SPECIFICATIONS					
ltem	Description / Values	Remarks			
Type number/model reference	GM9K1 & GM9K2 Series				
Mode of operation	Non Permanent (Max 9 hours)				
Potod cupply voltage	AC:240VAC / 50 Hz for <u>CE Mark</u> DC:6.5V by adapter				
Kaleu Supply Vollage	AC:120VAC / 60 Hz for <u>CSA Mark</u> DC:6.5V by adapter				
Power board maximum rated	450W / 240 VAC / 1.875 Amp for <u>CE Mark</u>	Using 3.15 Amp fuse			
output power	450W / 120 VAC / 3.75 Amp for <u>CSA Mark</u>	Using 5 Amp fuse			
Power board maximum rated	150W / 240 VAC / 0.625 Amp for <u>CE Mark</u>	Using 1.6 Amp fuse			
channel	150W / 120 VAC / 1.25 Amp for <u>CSA Mark</u>	Using 3 Amp fuse			
Protection class of enclosure	IP-00 for incorporation	AWARNING Installation environment required to keep away from water or moist			
Range of ambient temperatures	-20°C to 80°C ( -4°F to 176°F )				
Start-gas(Pilot) valve output rating	DC : 0.28 V~ 2.0 V				
Main-gas(Main) valve output rating	DC:0.28 V~ 2.0 V				
Second burner valve output rating	DC : +6VDC / -6VDC (Pulse signal)				
Pre-purge or Waiting time	11 Sec (Waiting time)	Interval between powered and ignition			
First safety time	60 Sec				
Flame failure response time	3 Sec				
Time to achieve safety shut down	0.2 Sec				
Time to achieve lockout	0.2 Sec				
Number of ignition attempts	1				
Sparking frequency range	6 Hz to 9 Hz				
Sparking voltage range	18 kV to 20.7 kV				
Software class	Class C

C14	Flash LED of Red 1 time and Green 4 time	MCU Store Data Error	MCU Store Data Error				
Status	Green LED Flashing 10 Sec	RF learning	Learning RF within Green LED flashing 10sec, it will beep twice after learned successful.				

# Warning

This device complies with part 15 of the FCC Rules.
Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

# Notice:

Any changes or modifications not expressly approved by the party responsible for

compliance could void your authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class

B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to

provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not

installed and used in accordance with the instructions, may cause harmful

interference to radio communications. However, there is no guarantee that

interference will not occur in a particular installation. If this equipment does cause

harmful interference to radio or television reception, which can be determined by

turning the equipment off and on, the user is encouraged to try to correct the

interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/ TV technician for help.

# Warning

This device complies with Industry Canada licence-exempt RSS standard(s).

Operation is subject to the following two conditions:

(1) this device may not cause interference, and

(2) this device must accept any interference, including interference

that may cause undesired operation of the device.

This Class B digital apparatus complies with Canadian ICES-0003.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence.

L'exploitation est autorisée aux deux conditions suivantes :

(1) l'appareil ne doit pas produire de brouillage, et

(2) l'utilisateur de l'appareil doit accepter tout brouillage

radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

This equipment complies with IC radiation exposure limits set forth for an

uncontrolled environment. The antenna should be installed and operated

with minimum distance of 20 cm between the radiator and your body.

This transmitter must not be co-located or operating in conjunction with any

other antenna or transmitter.

Cet appareil est conforme aux limites d'exposition aux rayonnements de la

IC pour un environnement non contrôlé. L'antenne doit être installé de façon

à garder une distance minimale de 20 centimètres entre la source de rayonnements et votre corps.

L'émetteur ne doit pas être colocalisé ni fonctionner conjointement avec à

autre antenne ou autre émetteur.

# FCC:

# Notice:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference and (2) this device must accept any interference received, including interference that may cause undesired operation.

# ISED(IC):

This device complies with Industry Canada's licence-exempt RSSs. Operation is subject to the following two conditions:

(1) This device may not cause interference; and

(2) This device must accept any interference, including interference that may cause undesired operation of the device. French:

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et

(2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.
