Reference: Product Statement regarding ifm product “LW2120 Non-Contact Level Transmitter” and Emerson product “Rosemount 1408A Level and Flow Transmitter” design

Dear Valued Emerson Customer,

LW2120 Non-Contact Level Transmitter is an ifm labelled version of Emerson product Rosemount 1408A Level and Flow Transmitter. These transmitters are both produced by Emerson.

Product Statement:

The LW2120 Non-Contact Level Transmitter and the Rosemount 1408A Level and Flow Transmitter both use identical hardware and embedded software and are both produced by Emerson.

Suppliers, production and product line are identical for these two product versions.

Differences are limited to product identification, product label, separate configuration software, packaging and selection of accessories. Additionally, flow functionality is by configuration not enabled in LW2120.

Current valid HW version is AA=1.00.00 and current valid firmware version is 1.C2.

Please contact your local Emerson Sales Representative with any application or ordering questions you may have for help finding your best solution. Emerson is committed to providing you with the highest level of quality and state-of-the art process measurement and control solutions. Thank you for allowing Emerson to continue to serve you now and in the future.

I hereby confirm this product statement.

Sincerely,

A handwritten signature in black ink that reads "Johan Sandahl".
