Subject: Sound Merchandising DBA IntelliTouch Communications, FCC ID: UNVEOS100-RX, Assessment NO.: AN07T6611, Notice#1

Question #1: The user manual does not include the required RF exposure statement, such as "To avoid the possibility of exceeding the FCC radio frequency exposure limits, human proximity to the antenna should not be less than 20 cm(8 inches)." Please revise the manual.

(ERIC: Please find the updates on the exhibit just attached.)

Question #2: The Request for confidentiality letter shows an incorrect FCC ID: UNVEOS100-Tx, please change it to FCC ID: UNVEOS100-TX.

(ERIC: Please find the updates on the exhibit just attached.)

Question #3: The test report shows the device has a total of 37 channels, which does not agree with the operational description in the filing. Please verify. (It should be 38 channels)

(ERIC: Please find the updates on the report just attached.)

Question #4: The test report shows the power output at high channel (2479Mhz) is very low, the device is possibly not functioning at all at high channel. Please verify. The operational description shows the device can be still working properly at high channel. You may need to retest at high channel and provide new test data.

(ERIC: Please find the updates on the report just attached.)

Best Regards,
Helen Zhao

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
