Welcome to AMGGO

OVERVIEW

Please note

All the functions in this manual should be operated in **Standby Mode**

Like the picture below.

Tips:

Press **END**  go back to the **Standby Mode**

(Standby Mode)

Make a call

Input the numbers, Press **Send** 

Answer a call.

Press the **Send** 

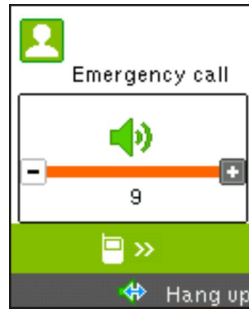

Tips:

***down Key** to volume down..

***up Key** to volume up. |

*Press **Left Soft Key** >_* to unlock the keypad

Call log

Missed

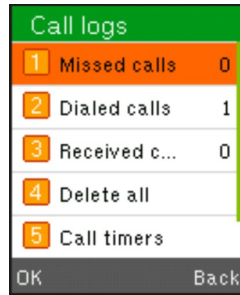

Left Soft Key >  > **ok** > **1**

Dialed

Left Soft Key >  > **ok** > **2**

Received

Left Soft Key >  > **ok** > **3**

contacts

To browse the name card holder, store, edit and delete the names and phone numbers in the phone and SIM card.

Contact List

Left Soft Key >  > **ok**

Group

Left Soft Key >  > **ok** > **Right Key**

Message

To receive and send the message.

Write Message

Press **left key**

You could write new message by using this function.

In box **Left Soft Key** >  > **ok** > **2**

Store the SMS and Push message received

Out box **Left Soft Key** >  > **ok** > **3**

Store the SMS you've sent in failure.

Drafts **Left Soft Key** >  > **ok** > **4**

Store the SMS you've edited.

Sent box **Left Soft Key** >  > **ok** > **5**

Store the SMS you've sent successfully.

Multimedia

FM Radio

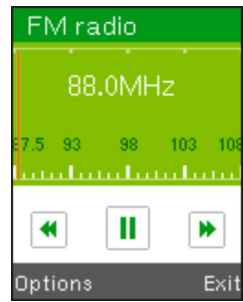

Please connect with the earphone You can listen in to Fm radio freely.

Press **Left Soft Key**  **ok**

Tip:

up Volume up

down Volume down

Camera

Select CAMERA on main menu to active it to capturing mode.

Roll the phone to align the camera to the picture.

Zoom in or out by pressing up or down direction key. Then select snapshot key (OK button) to capture the object.

Press **Left Soft Key** >  > **ok** > **1**

Internet

With the browser, you can view html web pages on internet.

Data account

Access this menu to set GPRS,

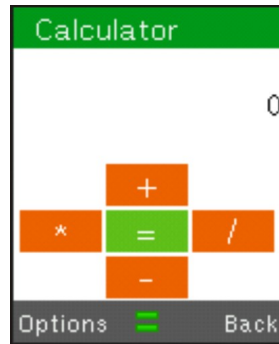

Press **Left Soft Key** >  > **ok** > **2**

***Depends on network support.**

Calculator

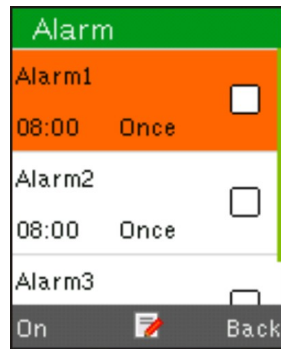

Press **Left Soft Key**  **>ok>5**

Alarm

You can setting the alarm by you phone

Press **Left Soft Key**  **>ok**

Calendar

To view date and add new schedule
for you working or live

Press **Left Soft Key** >  > **ok**

2013-08

FCC RF EXPOSURE INFORMATION:

WARNING!! Read this information before using your phone

In August 1986 the Federal Communications Commission (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards. Use only the supplied or an approved antenna. Unauthorized antennas, modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations. Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for replacement antenna.

BODY-WORN OPERATION:

This device was tested for typical body-worn operations with the back of the phone kept 10mm from the body. To comply with FCC RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user's body and the back of the phone, including the antenna. Third-party belt-clips, holsters and similar accessories containing metallic components shall not be used. Body-worn accessories that cannot maintain 10mm separation distance between the user's body and the back of the phone, and have not been tested for typical body-worn operations may not comply with FCC RF exposure limits and should be avoided. For more information about RF exposure, please visit the FCC website at www.fcc.gov

Your wireless handheld portable telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals. In August, 1996, the Federal Communications Commission (FCC) adopted RF exposure guidelines with safety levels for hand-held wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

<ANSI C95.1> (1992) / <NCRP Report 86> (1986) / <ICIMIRP> (1996)

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C95.1). Nevertheless, we recommend that you use a hands-free kit with your phone (such as an earpiece or headset) to avoid potential exposure to RF energy. The design of your phone complies with the FCC guidelines (and those standards).

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

NORMAL POSITION:

Hold the phone as you would any other telephone with the antenna pointed up and over your shoulder.

RF Exposure Information:

This product is in compliance with FCC RF Exposure requirements and refer to FCC website search for FCC ID: UOSAM208 to gain further information include SAR Values.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Do not use the device with the environment which below minimum -10°C or over maximum 50°C, the device may not work.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
