OVERVIEW

Please note

All the functions in this manual should be operated in __Standby Mode__

Like the picture below.

Tips:

Press **END** go back to the __Standby Mode__

(Standby Mode)

Make a call

Input the numbers, Press **Send** .

Answer a call. Press the **Send** .

Tips:

   *Down Key to volume down..

   *Up Key to volume up.

Call log

All calls

Menu> **>Call history>All calls.**
Dialed calls

<u>Menu</u>> >Call history>Dialled calls.

Missed calls

<u>Menu</u>> >Call history>Missed calls.

Received calls

<u>Menu</u>> >Call history>Received calls.

contacts

To browse the name card holder, store, edit and delete the names and phone numbers in the phone and SIM card.

Contact List

Menu>

Group

Menu> **>Options>Caller groups.**
Add new contact

Menu> **>Add new contact.**

Edit contact

Menu> **, select a contact>Options>Edit.**
Message

To receive and send the message.

Write Message

Menu> >**Write message**

You could write new message by using this function。

In box   Menu> >**Inbox**

Store the SMS and Push message received

Drafts   Menu> >**Drafts**

Store the SMS you've edited.

Out box   Menu> >**Outbox**

Store the SMS you've sent in failure.

Sent messages   Menu> >**Sent messages**

Store the SMS you've sent successfully.
BT

The device support BT.

❖ **Open/Close bluetooth**: This function allows you to switch the Bluetooth on or off.

❖ **Bluetooth visibility**: Set to show or hide the Bluetooth of your phone. If you select to hide the phone, other devices cannot detect the Bluetooth device of your phone, even you activated your Bluetooth function.

❖ **Paired device**: You can search for the nearby Bluetooth-enabled devices.

❖ **My Bluetooth name**: If Bluetooth function activated, while other devices search for Bluetooth signal, the corresponding name represents your phone.

❖ **Storage**: Able to set the storage location for files received via Bluetooth.

❖ **Help**: Provide relevant Bluetooth helping information.

Multimedia

FM Radio

Please connect with the earphone You can listen in to Fm radio freely.

Press Menu> > **FM Radio**

Camera

In standby mode press camera shortcut key to enter camera preview menu.

Roll the phone to align the camera to the picture.

Zoom in or out by pressing up or down direction key. Then select snapshot key ![camera] (OK button) to capture the object.

Press Menu> ![icon] >**Camera**

Internet

With the browser, you can view html web pages on internet.

<u>Menu</u>> ![icon] >**Internet service**

*Depends on network support.

Data account

   Access this menu to set GPRS, MMS and WAP-related parameter.

Calculator

Menu > >**Calculator**

World time

To view city of each time zone, corresponding date and time will display at the bottom of the screen. Press direction key to choose to view cities.

Menu > >**World clock**

Settings

You can customize the settings, such as time and date, language etc.

Menu >

Ring settings:

Menu>

Choose the Options To customize the ring settings options>customize

FCC RF EXPOSURE INFORMATION:

WARNING!! Read this information before using your phone

In August 1986 the Federal Communications Commission (FCC) of the United States with its action in Report and order FCC 96-326   adopted an updated safety standard for human exposure to radio frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards. Use only the supplied or an approved antenna. Unauthorized antennas modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations. Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for replacement antenna.

BODY-WORN OPERATION:

This device was tested for typical body-worn operations with the back of the phone kept 1.5cm from the body. To comply with FCC RF exposure requirements, a minimum separation distance of 1.5cm must be maintained between the user's body and the back of the phone, including the antenna, whether extended or retracted. Third-party belt-clips, holsters and similar accessories containing metallic components shall not be used. Body-worn accessories
that cannot maintain 1.5cm separation distance between the user's body and the back of the phone, and have not been tested for typical body-worn operations may not comply with FCC RF exposure limits and should be avoided.
For more information about RF exposure, please visit the FCC website at www.fcc.gov

Your wireless handheld portable telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals. In August, 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for hand-held wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

<ANSIC95.1> (1992) / <NCRP Report 86> (1986) / <ICIMIRP> (1996)

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C95.1). Nevertheless, we recommend that you use a hands-free kit with your phone (such as an earpiece or headset) to avoid potential exposure to RF energy. The design of your phone complies with the FCC guidelines (and those standards).

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

NORMAL POSITION:

Hold the phone as you would any other telephone with the antenna pointed up and over your shoulder.

TIPS ON EFFICIENT OPERATION:

For your phone to operate most efficiently:
• Extend your antenna fully.
• Do not touch the antenna unnecessarily when the phone is in use. Contact with the antenna affects call quality and may cause the phone to operate at a higher power level than otherwise needed.

RF Exposure Information:

FCC RF Exposure requirements: The highest SAR value reported under this standard during product certification for use next to the body with the minimum separation distance of 1.5cm is 0.617W/kg, next to the head is 1.035W/kg. This transmitter must not be collocated or operating in conjunction with any other antenna or transmitter.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help

Do not use the device with the environment which below minimum -10℃ or maximum over 50, the device may not work.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
