

## 2.4GHz DSSS SPI Radio with Integrated Power AmplifierAWA24R/AW24RUR

Product Name: CyFi PA Module

Model Number: AWA24R and AW24RUR

Date: October 12, 2016

CyFi PA Module Models

AWA24R – Branded as Legacy mode Radio Module

AW24RUR – Branded as CyFi mode Radio Module

Both models of AWA24 family have the same base circuitry and PCB. The only difference is on the digital controls side.

- On AWA24R module the mode of operation can only be controlled with provided control lines on the module 12 pin connector.
- On the AW24RUR module the mode can only be controlled with onboard internal digital GPIO. The mode control line's path is set with optional diode location population on the PCB. There is no change in any of the RF circuitry population between both models.

## **BOM** differences:

AWA24R - D1,D3,D5 populated . D2,D4,D6 not populate AW24RUR - D2,D4,D6 populated. D1,D3,D5 not
