

RF Exposure Statement

According to §1.1307(b)(1), systems operating under the provisions of this section shall be operated in a manner that ensures that the public is not exposed to radio frequency energy level in excess of the commission's guideline.

This is a portable device and the max peak output power is $3.6\text{dBm}=0.0023\text{W}$.
This output power is lower than the low threshold $(60/f_{\text{GHz}})\text{mW}$ at $d < 2.5\text{cm}$
 $(= 24.19\text{ mW})$ of the TCB Exclusion list for the general population exposure category.

Therefore, the SAR/MPE measurement is not necessary.
