**Evaluation of Inventec CM-G100
FCC id: UPMJGW200001**

I have assessed the above referenced submission for Inventec Appliances (Jiangning) Corporation and found it to be compliant. The product is a GSM/GPRS 1900 Module.

The following points were noted and resolved during the evaluation.

1. Module Characteristics

The letter confirming compliance with the FCC requirements for modules was not formalised. A revised signed document on company letterhead paper was received to correct this.

2. Test Reports

The test reports which were originally supplied had an incorrect registration number for FCC. The reports were subsequently issued with the new registration number for the State Monitoring Centre.

3. User Manual

There was no information regarding the installation requirements and antenna details or information regarding the visibility of the FCC ID label when installed in a host. Amendments were made to the manual and re-submitted.

Yours sincerely
