January 11, 2016

Attention: Application Examiner / Review Engineer

Subject: **Cover Letter for Change in ID application**

The Change in ID for

IC: 5895B-MS32018

Model: DRAEGER WCM9113 802.11 ABGN V2

covers the frequency bands

2402 to 2480 MHz

2405 to 2480 MHz

2412 to 2462 MHz

5180 to 5220 MHz Not enabled

5745 to 5825 MHz Not enabled

During initialization of the wireless module a band of operation must be selected. The Dräger product software is hard coded to only enable the 2.4GHz band of operation, thus the 5GHz band of operation is disabled and cannot be configured by the product without a software change to the Dräger product.

Sincerely,

Draeger Medical Systems, Inc.
Beth Zis
Director of Regulatory Affairs
