

American Certification Body Inc.  
6731 Whittier Ave, Suite C110, McLean, VA 22101, USA

**ACB:**

Looking at your labels, it looks like the product now contains a Bluetooth module. Please let me know if this is a change to be added because it is not explained on the C2PC request letters.

**Paxton Access:**

Following the addition of the Bluetooth module in August this year we did some emissions testing. The purpose of the testing was to assess the impact on the spurious emissions profile of the Net10 Reader after the addition of the Bluetooth module. As the test results showed no major changes to the emissions profile we decided not to file a permissive change.

I do not require this change to be added to the C2P2 as it is already covered by this previous verification test report; C1PC.
