Changes in power toothbrush Type 3738 , 3741, 3731	Aug., 21th, 2007

Author: M. Stratmann / T-MOCP 4

Non-confidential

Description of changes

Braun's product development and maintenance process means a permanent cost control and quality improvement. For this reason the PCB of the power toothbrush will be changed in the following manner:

For PCB cost reduction, the following components will be changed or added:
DC/ DC converter and external components IC5, L1, R19, R20, C30, R21, L2, C34.

For quality improvement of the RFID function the following components were changed or added: L3, Q1, C1, C2, C11, C32, C33, C34, C35.

For logistic reasons the PCB with the above changes will have a new part number 3738 082 rev. 03.

All other components and parts of the Triumph with SmartGuide sales unit will have no changes.

The sales unit consists of

- Rechargeable Power toothbrush, type 3738 (change of printed circuit board)
- DisplayUnit (SmartGuide) type 3741 (no changes)
- SmartCharger, type 3731 (no changes)
- Brushheads (no changes)
- Stand (no changes)
