

# Operating Description

## Wireless Audio Link IC

### **BH 1418 FV**

The BH1418FV is a FM stereo transmitter IC used for audio systems. The transmitter consists pre-emphasis circuit, limiter circuit, low-pass filter circuit. And, built-in the pilot-ton system FM stereo modulator circuit for generating stereo composite signals. And, PLL system FM transmitter circuit for broadcasting a FM signal on the air which data input (CE,CK,DA)by serial input. And, built-in the sound muting circuit.
