Columbia, MD 21046
Ref: FCC ID: **UTWP20N**

Dear Sirs:

Janam Technologies LLC requests acceptance of the labeling proposal described below for barcode scanner bearing FCC identifier **UTWP20N**.

The subject barcode scanner are compact handheld models as shown in figure 1, authorized under FCC Part 15 Class B.

Figure 1
Battery Pack

Because the majority of the device housing is composed of display, buzzer, keypad, and a removable battery pack, there is extremely limited space available to attach the required label carrying the FCC identifier. Attaching the label to the battery pack is not acceptable because the battery pack is a removable item. For this reason, Janam proposes placing the label carrying the FCC identifier inside the battery compartment as shown in figure 2.

Figure 2

The consumer packaging for these models includes the battery pack as a separate item, NOT installed on the device. As such, the FCC identifier will be readily visible to the user before the battery pack is installed and whenever the battery pack is removed or replaced. In this location, the label will also be protected from physical abuse and remain readable for the anticipated life of the device.

Sincerely,

Harry B Lerner
Principal & Co-CEO
