SUBJECT: Response Letter

FCC ID : UTWXM6X
Applicant: Janam Technologies LLC
Job No: 1466HC9

Dear Sir / Madam,

In response to the FCC application of the captioned job, the reply for the issue as below:

1. **Module with FCC ID TWG-SDMCF10G:** please submit a cover letter explaining the function and purpose of this module. Particularly, this handheld device has a microphone and speaker. Can it be used for voice operations next to the head? Does it support VoIP? Please explain compliance with **KDB publication 447498 Item 4)c)**.
https://fjallfoss.fcc.gov/oetcf/report_detail.cfm?report_url=/prod/oet/forms/blobs/IDBretrieve.cgi?attachment_id=27356

The module with FCC ID: TWG-SDMCF10G is approved WLAN module. It is used in wireless communication. The maximum transmission power of this module is 77.446mW (below $300 \times [f_{(GHz)}]^{-0.5}$). And the final product, **Handheld Computer Type Barcode Scanner** doesn't support VoIP and can't be used for voice operation next to the head. Therefore, no SAR measurement required.

2. **Cover letter:** Also, it is should be indicated in letter whether this module is electrically identical to that originally approved and whether the antenna is already approved.

Please refer the cover letter with filename FCC_Review_ DSS_UTWXM6X Cover Letter1.pdf.

3. **Test Report/Collocation:** Please indicate in cover letter whether the applicant is aware of his/her responsibility to ensure that the product still complies when all transmitter modules are operating simultaneously. The FCC does not require submittal of intermod emissions data, if any. So, please do not submit any data for this. Otherwise, there will be additional charges.

Please refer the cover letter with filename FCC_Review_ DSS_UTWXM6X Cover Letter2.pdf.

Should you have any further queries, please feel free to contact me.

Yours Faithfully,

Danny Chui
