

Radio frequency radiation exposure evaluation: portable devices

RESULT :

Pass

Test Specification

Test item	: MOTO CROSSLANDER
Identification / Type No.	: RC18
FCC ID	: UU8-RC18
Test standard	: CFR47 FCC Part 2: Section 2.1093 FCC KDB Publication 447498 D04

Measurement Record:

E.I.R.P = 73.29 - 95.2 = -21.91dBm

Since maximum peak output power of the transmitter is -21.91dBm \approx 0.0064mW < 3 mW.

Hence the EUT is excluded from SAR evaluation according to FCC KDB Publication 447498 D04
