

The logo consists of a thin, light-colored circle centered on a black background. Inside the circle, the word "gramofon" is written in a lowercase, sans-serif font. The letters are a light gray or off-white color, matching the circle's outline. The word is centered horizontally and vertically within the circle.

gramofon

Welcome

Go to <http://register.fon.com>
or
Download the Fonera Setup App

Router Setup

1. Connect the orange cable to your modem and the other end to orange socket. Wait for the top ring to turn green.

2. Look under your Gramofon. Locate the WPA key for MyPlace.

3. Manage your Gramofon and get access to advance features.

To log into the management portal, open a browser and type `http://fonera` into the URL field. Alternatively, you can enter the IP address `http://192.168.10.1` .

When prompted, enter the password "admin".

WPS Coupling

1. Plug the power adapter.
2. Make sure there is no ethernet cable connected to the "Internet" socket of the Gramofon and that the Gramofon is within wifi coverage of the broadband router (can check this with their mobile's list of available SSIDs).
3. Press the WPS button on your home router (there is a precondition to this process that this button actually exists).
4. Press and hold the top button of the Gramofon until the light changes to blinking "XXXXX" (haven't decided the color yet), then release it.
5. Then the Gramofon will automatically couple with their broadband router and the led will switch to solid "XXXXX".
6. If the process fails, the Gramofon will return to its original state.
