Object: Class II Permissive Change for A828US OEM UHF Compact reader (FCC part 15)  
FCC ID: UVECAENRFID001

This letter serves as an official request for FCC approval of a Class II Permissive Change for our A828US OEM UHF Compact reader (FCC part 15).

The reasons for the Class II change are the following:

- Redesign of the mechanical box in order to improve shielding efficiency.
- Addition of a filter into the RF output path in order to reduce the level of conducted harmonic emissions.
- Addition of internal shield for PLL block

RF testing is necessary in order to demonstrate that the reader remains compliant with FCC rules. All design change are summarized in the document entitled *A828US Design Change Description*.

Sincerely,

Adriano Bigongiari  
Chief Operating Officer
