RE: Deleted changed circuit (base on P25)
FCC ID: UWJP25M
Model Number : P25-M

Dear Sir,

I need add a MSR(Magnetic Stripe Reader) function circuit form mainboard port connect to MSR port by cable. MSR is integrity circuit module machine. The MSR name PA-HED1007S-41. After add MSR function, called model number : P25-M and FCC ID : UWJP25M. At base on P25 the other circuit, base function, bluetooth module with antenna and plastic frame do not any changed except add MSR function circuit. The MSR mechanical plastic put near outer body. The above is specific description by bluebamboo declared to FCC.

Thank you for appreciation.
