

Summary of RF Exposure

This device is operated in a manner that ensures the public is not exposed to radio frequency energy levels in excess of the Commission's guidelines. This device is categorically excluded from routine environmental evaluation. This device operates in a portable configuration under 47 CFR 15.209, and a mobile configuration under 15.249, and is therefore excluded from SAR evaluation based upon 2.1093(c) and its low EIRP (< 1mW).
