The ComNav X5 Class A AIS Transceiver (21410006) differs from the SRT Apollo (425-0002) only in branding, it's features, functionality and performance are the same. The branding extends to the MKD software, front panel label and the covers on the product manual, nothing else is different. Also, a new GNSS Antenna (304-0015) with 10m cable is provided with the product. The new GNSS antenna uses the same antenna as provided with SRT Apollo but is with a 10M cable attached for user convenience. Therefore, all the test results and reports provided with the original application for the SRT Apollo (425-0002) apply equally to the ComNav X5 (21410006) This letter is permission from SRT Marine Systems plc for an application to be made for the ComNav X5 (21410006) based on the grant for the SRT Apollo (425-0002) using the reports provided as part of that original application.

Yours sincerely,

Abdul Mohammed
