**Relationship between Artemis (UYW-427-0002B) & Apollo (UYW-425-0002A)**

The Artemis (427-0002) AIS Class B transceiver AIS circuitry and hardware are identical to the Apollo (425-0002) AIS Class A transceiver. The only exception being application software, ratings label, product fascia label and documentation. As such, test reports gained from Apollo have been shared to cover Artemis requirements where applicable. Class B testing has been performed to IEC 62287-2, referring to IEC 60945 as applicable.

Yours sincerely,

A handwritten signature in blue ink, appearing to read 'P Pittaway'.
