Dear Sir or Madam

The SRT-MTB-OEM AIS Class B Transponder should not be classified as a 'Software Defined Radio'.

The operating parameters of the radio can be altered by making a change in software, however Software Radio Technology plc. maintains complete control of the software. As such the device does not have to be declared SDR. I would be grateful if you could modify the SDR status on the Form 731 for this submission accordingly.

Yours sincerely,

Matthew Clarke MEng CEng MIET
