

MOTOROLA SOLUTIONS

Regulatory Engineering

Date: January 25, 2013

Federal Communications Commission
Authorization and Evaluation Division

SUBJECT: FCC Application for FCC ID: UZ7MC67NA

To Whom It May Concern:

We, Motorola Solutions, Inc., would like to enable 2.4GHz WLAN channel 12 and 13 operation, and no hardware changes have been made. In the part 15.247 test report of the original equipment authorization, the test data of channel 12 and 13 is included and is justified to be compliant with FCC requirement.

2.4GHz channel 12 and 13 highest average power is 9.31 dBm, smaller than 16.29 dBm which is the highest power among channel 1 to channel 11, and the highest reported WLAN SAR is 0.36 W/kg for head position in the original equipment authorization. Due to the SAR level is smaller than 50% of FCC limit, RF exposure assessment for channel 12 and 13 is not required.

We would like to certify the addition of certified FCC ID: UZ7MC67NA as a Class II Permissive Change.

Yours sincerely,

A handwritten signature in blue ink that reads "Marco Belli".
