Suite C110  
McLean, VA 22101

Subject: Letter of Aestation

To the Commission:

We, the undersigned, attest that the (802.11 abg WLAN) radio transmitter module originally approved under FCC ID: UZ7MC9590 then later added RF testing for channel 12 and channel 13, no changes were made to the hardware.

- Channel 12 and channel 13 were enabled through a software change.
- The transmitter output power on these two channels is fixed at minimum power.
- Additional filtering was not required to maintain Band-Edge Compliance (due to the low power setting for these channels)
- The maximum transmit power remains unchanged so the original SAR reports remain in effect. (At less than 12 Mw (Peak power) these two channels fall below the limit to require SAR reevaluation.)

Sincerely yours,

A handwritten signature in black ink, appearing to read 'Mark S. Luksich', written over a horizontal line.
