**Subject:** Re : RE: ADT alternative DFS method approval request

Dear all,

I do really appreciate all your kind offer of DFS issue . Many thanks.

Dear Joe,

Regarding to the content of FCC 06-96 shown as below, would you please provide me a formal letter or certificate of ADT DFS Measurement System? The evidence to show ADT DFS Measurement System has be recognized by FCC is more convenience for me to submit the projects of client device (without DFS function) to TCB.

Other instrument configurations may also be used. However, any deviations from the subsystems described here must be submitted to the FCC for evaluation.

Your prompt attention to this matter would be greatly appreciated.  
Thanks.

Best Regards,

Bruce Shiau / 蕭鴻凱

主旨RE: ADT alternative DFS method approval request

Thanks Bob, This e-mail is acceptable so nothing else is required.

Bruce, you can go ahead and start submitting Certification filings using the test setup you submitted.

Thanks all!

Joe

Subject: Re: ADT alternative DFS method approval request

Hi Joe,

The packet submitted by ADT looks fine to me . They have supplied all the plots and explained their system quite well . I will CC Ed on this message . At this point , does the FCC need something from NTIA to give official approval to get their system certified to be used for testing ? Let Ed and me know what is required . Thanks for keeping us in the loop .
