To whom it may concern:

I, the undersigned, hereby declared that the product, model: JL06, meets KDB 784748 D01 Labeling Part 15 &18 Guidelines.

This device meets the labeling requirements because it is not on the external surface but is located in the battery compartment that holds the battery. This is allowed because of the following:

1. The device is handheld.
2. The FCC identifier is visible at the time of purchase. The device is marketed without the battery installed.
3. The user accessible area does not require any special tools for access (a small Coin will open it) and the FCC label must not be placed on a removable part (although the compartment is removable it contains the battery contacts and holds the battery).
4. The FCC ID, Model Number, or FCC logo are on the label and it meets all the general labeling requirements or policies that apply for certification.

Sincerely Yours,

Rely Labres / Sr. Manager, Compliance Engineering
