Limited Modular Approval request Letter

To Whom It May Concern:

We, Advanced Card Systems Ltd., hereby request limited modular approval for our Contactless Smart Card Reader and Writer (Model Name: ACM1281S/FCC ID: V5MACM1281S)

This module complies with the Limited modular approval basic requirements in FCC Part 15 Subpart C Section 15.212 and clearly explained below:

- 1, The module don't have its own RF shielding; and it can be demonstrated in EXHIBIT B External Photo.
- 2, The modular transmitter have buffered modulation/data inputs,Buffered data inputs stage has been integrated in chip(model:RC531)
- 3, The modular transmitter have its own power supply regulation.
- 4, Comply with the antenna requirements of Section 15.203 and 15.204(c),the module has a unique antenna, A built-in on board antenna, which is surrounding the PCB, is used for communication between the reader and smart card.
- 5, Tested in a PC-linked configuration, the modular transmitter has been performed the testing as a PC-linked and then confirmed the compliance.
- 6, The modular transmitter is labeled with its own FCC ID number
- 7, Comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. The necessary explanation to be complied with this requirement is contained in the use manual, and please refers to the Use manual.
- 8, Comply with any applicable RF exposure requirements in its final configuration.

Sincerely Yours,
