Re: 5GNR Attestation

FCC ID: V65C6930

To whom it may concern,

We, Kyocera Corporation, hereby declares that the test result for OTT by using ABM1 values obtained from IP connection for magnetic intensity for a call in the same band as the 5G sub6 band under test and ABM2 values for 5G sub 6 connections over the same bands provides a reasonable representation of the HAC rating over the 5G sub 6 connections.

Sincerely yours,
