Subject: Affidavit for MEID Protection of Cellular Mobile Telephones
FCC ID: V65E4100

We hereby certify that the Handheld Portable Cellular Telephone, **FCC ID: V65E4100** is so designed that it complies with all the requirements for MEID protection specified in Section 22.919.

- a) The transmitter in service has a unique MEID.
- b) The MEID host component is permanently attached to a main circuit board of the mobile transmitter and the integrity of the unit operating software cannot be altered. The MEID is plated from fraudulent contact and tampering. The MEID is encoded using multiplication by a polynomial and the MEID data programmed in the memory with other information.
- c) The MEID is factory-set and cannot be altered, transferred, removed or otherwise able to be manipulated. Cellular mobile equipment is specifically designed such that any attempt to remove, tamper with, or change the MEID chip, its logic system, or firmware originally programmed by the manufacturer will render the mobile transmitter inoperative.

Best Regards,
