Declaration Letter for Dual Client Devices (6CD)

We, **Kyocera Corporation**, attest that this device under **FCC ID: V65E7200** complies with device protocol requirements and operational restrictions for Dual Client Devices (6CD).

- a) This device does not support Subordinate client/6PP equipment class and the maximum power does not exceed authorized values.
- b) This device will only associate and connect with a low-power indoor Access Point, subordinate device, or standard access point and never directly link to any other client devices.
- c) This device will always initiate transmission under the control of a low-power indoor AP or subordinate device or standard power access point except for brief communications before joining a network. These quick messages will only occur if the client has detected an indoor AP, subordinate, or standard access point operating on a channel. These brief messages will have a time-out mechanism such that if it does not receive a response from an AP it will not continually repeat the request.
- d) This device when associated and connected with a low-power indoor access point, subordinate or standard power access point device, will operate at or below power levels as advertised by the indoor access point, subordinate, or standard access point:
 - i. lower than or equal to the power advertised by the low-power indoor access point or subordinate and never above the maximum output power allowed by the FCC grant for clients associated with indoor clients or subordinates.
 - ii. lower than or 6 dB below the power advertised by the standard access point.
- e) We acknowledge this device is subject to and in full compliance with the device restrictions listed below.
 - Prohibited for control of or communications with unmanned aircraft systems, including drones.
 - Has no direct connection to the internet.

If you should have any questions regarding this declaration, please do not hesitate to contact us, thank you!

Sincerely yours,

Thuy To/ Regulatory Affairs Manager
