Attachments: 1A_SA001_Technical Description.pdf

Dear Chris,

I have attached the Operation Description again (there are 5 pages). If this is not a complete description could you elaborate what detailed information you need. All of the exhibits are for the correct device.

Regards,
Tina

Dear Tina To,

You are listed as the Technical Contact for the above referenced TCB application. The following items need(to be resolved before the review can be continued:

The Operational Description exhibit does not contain any technical details about this device. Please update the Operational Description exhibit to include the operational description.

Please confirm that all of the exhibits are for the correct device (the External Photos show a black phone, the RF Test Setup Photos show a pink phone and the SAR setup seems to show a silver phone).

Please note that I have changed the online application form classification from PCE to TNE, since this device does not operate in teh PCS band.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.

Best regards,

Chris Harvey
