Declaration

To whom it may concern.

SCP-8600 is a WLAN/BT combination antenna with FCC ID: V65SCP-8600. This WLAN/BT co-existence mechanism is to ensure that WLAN and BT transmitters would not simultaneously operate. Therefore, WLAN and BT antenna in SCP-8600 should not be considered to be able to transmit simultaneously, but real solution is that WLAN and BT are used by time sharing and not overlap transmission.

Should you have any questions, please have my best attention.

Sincerely,

C. K. Li
